Mr. Dan O'Halloran
Pressure Relief Engineer
Fike Corp.

Mr. O'Halloran,

In reference to 3A sanitary compliance for materials supplied to Fike Corp. by JADE ENGINEERED PLASTICS. Please be advised of the following.

Virgin PTFE Gaskets produced by Jade are manufactured from DuPont 8B Fluoropolymer resin and is in compliance to 3A sanitary specification Standard 20-23. Test requirements have not changed from Standard 20-20 to Standard 20-23.

JLON compound J-1500, which is a proprietary filled PTFE of Virgin PTFE and Stainless Steel is also certified to 3A Sanitary 20-23. All test data supporting this certification is on file at JADE ENGINEERED PLASTICS.

All Purchase Orders accepted by JADE ENGINEERED PLASTICS is produced from materials as identified on Fike purchase orders with no substitution.

Additionally both DuPont 8B resin and JLON J-1500 resin are compliant to FDA 21 CFR 177.1550 and have Certification for Compliance to USP 27 NF 2004 Class VI.

I trust this information is sufficient to address all of your needs. If additional information is required please do not hesitate to call.

Regards

Jim McCormick
