

EXPLOSION PROTECTION SYSTEM SERVICE OPTIONS

DESCRIPTION

To mitigate against the threat of industrial explosions, Fike provides a wide range of explosion protection products and services to industry. From explosion testing, to explosion vents, suppression systems, and isolation systems, Fike has the strategies and tools to protect your plant from the devastation of process explosion. Purchasing and installing Fike Explosion Protection is a sound business investment. This data sheet tells you how to maximize your investment by utilizing Fike's complete range of Explosion Protection System Service Options. Contact your local Fike representative or a sales manager in your area for further questions.

SYSTEM STARTUP AND COMMISSIONING

Fike can provide a turnkey system from start to finish with expert technical assistance to assure that your system is installed correctly. Once your system is installed, Fike technicians can bring it "online" quickly.

PERIODIC SYSTEM INSPECTIONS

Fike can, at your option, provide you with annual, semi-annual, or quarterly inspections to assure maximum system effectiveness and regulatory compliance. Fike technicians are well-trained by Fike Explosion Protection experts and are intimately familiar with the technical and operational aspects of our systems.

EMERGENCY SERVICE

Fike provides 24 hour emergency response to customers who have incurred a system activation. This keeps your plant downtime at a minimum.

FACTORY AUTHORIZED TRAINING PROGRAMS

The Occupational Safety and Health Administration (OSHA) has recently adopted a standing National Fire Protection Association (NFPA) mandate that all owners of explosion suppression systems schedule system maintenance by factory or factory trained personnel. European standards specify that protection systems shall be commissioned, inspected and serviced by a competent person. Fike can provide on-site training of your personnel to perform such maintenance.

24 HOUR TECHNICAL INFORMATION AND TROUBLESHOOTING

Often, system irregularities can be diagnosed and fixed with the help of our 24 hour telephone technical service. Factory trained technicians are well-trained to trouble shoot many problems right over the phone.

READY ACCESS TO PARTS

Fike maintains an inventory of the most requested replacement parts, not only at the factory, but at our regional locations as well. This assures you of minimum system downtime and maximum process protection.

Locations of our global sales and support organization are available through our web site at www.fike.com.
