**CO₂ LATCH DOOR TYPE PULL BOX**

**DESCRIPTION**

The Latch Door Pull Box on a carbon dioxide system is used to provide mechanical operation of the Stop/Selector valve and/or the Local Lever Actuator from a remote location. The Latch Door Pull Box has a solid cast brass door that must be opened in order to access the pull handle. The pull handle is attached to a 1/16" (2mm) diameter stainless steel actuation cable. A 3/8" NPT female opening is provided in the back of the enclosure for connection of the cable and piping system.

A Corner Pulley may be attached directly to the back of the Pull Box if an immediate change of direction is necessary. Up to 100 ft. (30.5 m) of cable, and a maximum of fifteen (15) Corner Pulleys may be used for each cable run.

**SPECIFICATIONS**

- **Part Number:** C70-242
- **Materials:** Pull Box: Brass
- **Paint:** Red polyurethane

**APPROVALS:**

- UL Listed - Ex 4447
- USCG - 162.038/12/0
